

TNS now offers managed hosting, market data and exchange access services for B3 through TNS' Layer 1 connectivity.

This network expansion enhances trading opportunities for US, European and other traders seeking optimized connections with the exchange.

Our ultra-low latency connectivity provides reliable trading, clearing and settlement operations across equities, derivatives and commodities.

2023

3.2% GDP for

ultra low latency trading

We are ready to lead clients globally through data center and market data deployments.

TNS has had an office in Brazil since 2019 for its 100 + employees in country and has been working with the B3 exchange since 2021 when it launched market data access for traders.

In another significant milestone in TNS' expansion in the region, we recently opened a
